FOREIGN AND INSULAR.

BRAZIL.

Reports from Bahia—Mortuary statistics.

Consul Furniss reports, August 3 and 10, as follows: During the week ended August 1, 1903, 78 bodies were interred in the Bahia cemeteries.

The causes given for interment were the following: Arterio-sclerosis, 4; beriberi, 5; bronchitis, 1; cirrhosis of liver, 1; diarrhea and enteritis, 3; gangrene, 1; hepatitis, 1; intestinal obstruction, 1; malarial fevers, 8; meningitis, 1; nephritis, 2; organic diseases of heart, 5; puerperal eclampsia, 1; pneumonia, 1; pulmonary tuberculosis, 4; rachitis, 2; senile debility, 3; stillborn, 8; syncope, 1; tetanus neonatorum, 1; umbilical hemorrhage, 5; other causes, 19.

During the week ended August 8, 1903, 94 bodies were interred in the Bahia cemeteries.

The causes given for interment were the following: Arterio-sclerosis, 1; asthma, 1; beriberi, 3; Bright's disease, 5; cerebral congestion, 3; cirrhosis of liver, 2; death by violence, 1; diabetes, 1; diarrhea and enteritis, 7; intestinal obstruction, 1; intestinal parasites, 1; malarial fevers, 10; myelitis, 1; nephritis, 4; organic diseases of heart, 4; peritonitis, 1; pneumonia, 5; pulmonary tuberculosis, 13; senile debility, 4; septic fever, 1; stillborn, 6; tetanus, 2; tetanus neonatorum, 1; typhus fever, 1; other causes, 15.

CANADA.

Inspection of immigrants at Quebec.

Assistant Surgeon Billings reports, September 1, as follows: Week ended August 29, 1903. Number of immigrants inspected, 485; passed, 474; detained, 11.

Month of August, 1903. Number of immigrants inspected, 1,894; number passed, 1,816; number detained, 78.

CHINA.

Report from Hongkong—Plague—Cholera at Amoy.

Passed Assistant Surgeon McMullen reports, July 30, as follows: During the week ended July 25, 1903, eleven vessels, with 754 crew and 276 passengers (162 cabin and 114 steerage) were inspected and granted bills of health, 509 crew and 107 steerage passengers were bathed, and 529 pieces of baggage disinfected. Thirteen cases of plague (1 Japanese and 12 Chinese) were reported for the week, with 11 deaths, a total of 1,363 since January 1, 1903. One case each of enteric and puerperal fever were the only other communicable diseases reported. Numerous cases of cholera are reported at Amoy.

COLOMBIA.

Report from Bocas del Toro, fruit port—Smallpox situation improving.

Acting Assistant Surgeon Osterhout reports as follows: Week ended August 25, 1903. Present officially estimated population not obtainable. One case of smallpox during the week; no deaths; number of deaths from other causes, 6; prevailing diseases, smallpox and malarial fever. General sanitary condition of this port and the surrounding country during the week, not good. The smallpox situation is much improved. The infection seems to be principally in the subports in the lagoons. Malarial fever of a severe type is quite prevalent. I see many of the cases. Nothing of a suspicious character is to be found.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 19	Fort Morgan	23	0	0	0
19	Beatrice	21	0	0	0
21	Taunton	25	0	0	0
23	Belvernon	22	0	0	0

COSTA RICA.

Report from Limon, fruit port—Yellow fever—Case of leprosy imported.

Acting Assistant Surgeon Gruver reports as follows: Week ended August 27, 1903. Census population, 4,000; number of cases of yellow fever, 2—1 death; number of deaths from other causes, 10; prevailing diseases, yellow fever, malarial diseases, and tuberculosis.

General sanitary condition of this port and the surrounding country during the week, very poor. One case leprosy sent here August 25 from Buffalo farm (W. F. Co.), about 15 miles distant. The case still remains in town.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 21	Hispania	19	0	0	0
22	Harold	20	0	0	0
24	Alene	42	8	2	0
26	Brewster	32	0	0	0
26	Beverly	38	2	0	0

CUBA.

Report from Habana—Inspection of vessels—Mortality statistics.

Assistant Surgeon Trotter, in temporary charge, reports, September 3, as follows:

Week ended August 29, 1903.

Health certificates issued	92
Vessels inspected and issued bills of health	26
Crews of outgoing vessels inspected	1,019
Passengers of outgoing vessels inspected	456
Pieces of baggage inspected	121
Pieces of freight inspected	1,657
Pieces of express inspected	18
Pieces of baggage disinfected	5

Mortuary report of Habana for the week ended August 29, 1903.

Disease.	Number of deaths.
Tuberculosis	20
Pneumonia	5
Bronchitis	4
Meningitis	3
Enteritis	2
Scarlet fever	2
Malarial fever	1
Cancer	6
Enteric fever	1

Total deaths from all causes, 100.

Report from Santiago—Mortality statistics—Disinfection of vessel from East London to kill rats.

Acting Assistant Surgeon Wilson reports, August 24, as follows: Week ended August 22, 1903. Bills of health issued to two vessels bound for the United States. No quarantinable disease has been reported.

On the 19th instant the Swedish bark *Bertha* arrived from East London, Cape Colony, after a journey of sixty days. No one was sick on board, but as the vessel came from a port which, according to the bill of health, was infected with bubonic plague, it was quarantined and disinfected to kill the rats.

Mortality report for the week ended August 22, 1903.

Causes of death.	Number.
Pernicious fever	1
Malarial cachexia	1
Tubercle of larynx	1
Organic heart disease	1
Arterio-sclerosis	1
Hæmophilia	1
Bronchitis, acute	1
Diarrhea and enteritis (under 2 years)	3
Diarrhea and enteritis (chronic)	1
Burns	1
Ill defined or unspecified	1
Total	13

Annual rate of mortality for the week, 15.72 per 1,000; estimated population, 43,000.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, August 24, as follows:

Plague.

Egypt.—During the period from the 1st to the 7th of August there were registered in the whole of Egypt 14 cases of plague (with 8 deaths), namely, 9 cases (4 deaths) in Alexandria; 3 cases (3 deaths) in Damiette, and 2 cases (1 death) in Port Said.

British India.—During the week ended July 18 there were registered in the Bombay Presidency 2,457 cases of plague (with 1,817 deaths).

Japan.—In Nagasaki, according to an official report dated June 30, plague has been stamped out. During the months of April and May over 20,000 rats were killed.

British South Africa.—In Cape Colony during the period from the 12th to the 18th of June the following plague cases were registered: Port Elizabeth, 1 case; East London, 1 case; Queenstown, 1 case. Plague rats continue to be found in Port Elizabeth, Queenstown, and King Williams Town.

Plague and cholera.

British India.—In Calcutta during the period from the 5th to the 11th of July 15 persons died of plague and 35 persons died of cholera.

Cholera.

Turkey.—According to weekly bulletin regarding cholera in Syria the disease continues to spread. There have recently been registered 1,391 fresh cases (and 1,116 deaths).

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended August 24, 1903. Present officially estimated population, 3,500; no deaths; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 18	David	20	.....	.....	.....
18	Breakwater	34	2	.....	4

The *Breakwater* cleared from Puerto Barrios.

HAWAII.

Quarantine transactions at Honolulu.

Passed Assistant Surgeon Cofer, chief quarantine officer for Hawaii, reports, August 22, as follows:

Week ended August 22, 1903.

Vessels inspected and bills of health issued	4
Vessels disinfected	4
Cabin passengers inspected	89
Steerage passengers inspected	136
Crew inspected	180
Pieces of steerage passengers' baggage disinfected and passed	147
Pieces of crew's baggage disinfected and passed	14
Hides and skins disinfected	71
Pieces of freight disinfected	4
Passengers and crew declined certification	0
Bags of horns and bones disinfected	162

Quarantine transactions for the month of July, 1903.

PALERMO.

Aug. 14	Patria	New York	218		325	34

JAPAN.

Report from Yokohama—Plague and cholerine.

Assistant Surgeon Moore reports, August 7, as follows:

During the week ended August 1, 1903, five vessels, having an aggregate personnel of 431 crew and 550 passengers, were inspected, 193 steerage passengers and 16 crew were bathed, and 363 pieces of baggage were disinfected. The official report of contagious diseases in Yokohama for the week ended July 25 shows: enteric fever, 4 cases, 2 deaths; diphtheria, 1 case, 1 death; plague, 3 cases (previously reported), 1 death; dysentery, 11 cases, 0 deaths. The same report for the week ended August 1 shows: enteric fever, 8 cases, 1 death; diphtheria, 1 case, 0 deaths; plague, 0 cases, 1 death; dysentery, 12 cases, 1 death.

Cases of cholerine, some of which are probably true cholera, continue to be reported from Kobe and other places in southern Japan.

MEXICO.

Report from Progreso and Merida—Inspection of vessels—Yellow fever.

Acting Assistant Surgeon Harrison reports, August 29, as follows: Week ended August 29, 1903. Present officially estimated population, 8,000 (about); 1 case of yellow fever during the week; 1 death; number of deaths from other causes during the week, 9. Prevailing diseases, malarial and enteric.

General sanitary condition of this port and the surrounding country during the week, fairly good.

Merida.—Deaths 30, from following causes: Yellow fever, enteritis, gastritis, pernicious fever, meningitis, traumatism, broncho-pneumonia, etc.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 22	City of Washington	New York	71	a 40	35

27	Santiago de Cuba	New York	28			
29	Hörda	Boston	25			

a For New York, 10.

Report from Tampico—Inspection of vessels—Yellow fever—Mortality statistics.

Temporary Acting Assistant Surgeon Lippincott reports, August 31, as follows:

Week ended August 29, 1903.

Bills of health issued	5
Vessels disinfected and passed	2
Vessels inspected and passed	3
Personnel of crew	168
Passengers in transit	2
Baggage, pieces	2

During the week there were 9 cases of yellow fever officially reported; remaining from the previous week 17, making a total of 26 cases for the week ended August 29.

There were 22 deaths recorded from all causes, of which 6 were from yellow fever, 2 from tuberculosis, 2 from pernicious fever, 1 from cachexia palustris, 1 from tetanus, and 10 from noncontagious causes.

This shows a decided improvement in number of cases and deaths, probably due to there being very few nonimmunes remaining in this city.

The surrounding country is still badly infected.

John Tesclier, of the British steamship *Texan*, was removed and sent to hospital on August 25 with a temperature of 40°; proved malarial and was discharged from hospital on August 29.

Assistant Surgeon Richardson at Tampico forwards the following under date of August 30:

Weekly report of cases of yellow fever and deaths registered at this port from May 3 to August 24, 1903.

Week.	Cases.	Deaths.	Week.	Cases.	Deaths.
May 3 to 9	2	2	July 12 to 18	69	40
May 10 to 16	5	1	July 19 to 25	42	40
May 17 to 23	4	3	July 26 to August 1	41	21
May 24 to 30	8	5	August 2 to 8	30	12
May 31 to June 6	18	9	August 9 to 15	31	17
June 7 to 13	14	9	August 16 to 22	24	20
June 14 to 20	42	21	August 23 to 24	2	1
June 21 to 27	56	34			
June 28 to July 4	49	36	Total	478	301
July 5 to 11	41	30			

Report from Vera Cruz—Mortality statistics—Yellow fever—Increase in number of cases of malarial disease.

Assistant Surgeon Goldberger reports, August 31, as follows:

During the week ended August 29, 1903, there was recorded in this city a total of 130 deaths from all causes; of these, 36 were due to yellow fever, 9 to tuberculosis, and 18 to malaria.

The sanitary condition of the port is much as at the date of my last report. With the first of next month the authorities expect to begin their campaign against yellow fever. Judging from the considerable increase in the number of cases of malarial disease, a sanitary campaign against this disease would be highly desirable.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Goodman reports as follows: Week ended August 29, 1903. Present officially estimated population, 4,000; 3 deaths; prevailing disease, malarial fever and intestinal disorders. General sanitary condition of this port and the surrounding country during the week good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 23	Esther	19	17	0	41
24	Osceola	33	0	0	0
24	Alliance	15	0	0	0
27	Jno. Wilson	17	7	0	0

PERU.

Recurrence of plague on littoral of Peru and northern Bolivia.

The following is received from Minister Dudley at Lima, under date of August 13: Within a few days bubonic plague has reappeared upon the coast of Peru at Mollendo, the port of Arequipa and northern Bolivia (including La Paz), and at Pacasmayo, about 250 miles north of Callao. The number of cases thus far reported is small, but shipping from the two ports named is, of course, subjected to rigid quarantine at all other Peruvian ports.

Little surprise is felt at the return of the plague in view of the outbreak in May at Callao and Pisco, and its existence for several weeks past at Iquique and Valparaiso. It has in truth never disappeared from the coast of these adjoining Republics since it appeared at Callao over three months ago.

PHILIPPINE ISLANDS.

VENEZUELA.

General diffusion of smallpox.

Consul Ellsworth at Puerto Cabello reports, August 17, as follows: Smallpox has made its appearance in Maturin. The disease has passed, with fatality, over nearly the whole of the Republic, with the movement of the troops in the campaign.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

BRAZIL—*Pernambuco.*—Two weeks ended June 30, 1903. Estimated population, 200,000. Total number of deaths, 262, including smallpox 2, yellow fever 1, and 45 from phthisis pulmonalis.

Two weeks ended July 15, 1903. Total nnmber of deaths, 240, including smallpox 6, and 37 from phthisis pulmonalis.

DUTCH GUIANA—*Paramaribo.*—Month of July, 1903. Estimated population, 32,263. Total number of deaths, 94. No contagious diseases reported.

GIBRALTAR.—Two weeks ended August 9, 1903. Estimated population, 27,460. Total number of deaths, 12. No deaths from contagious diseases reported.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended August 15, 1903, correspond to an annual rate of 15.7 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand two hundred and fifty-five deaths were registered during the week, including measles 24, scarlet fever 8, diphtheria 11, whooping cough 15, enteric fever 4, and diarrhea 139. The deaths from all causes correspond to an annual rate of 14.2 per 1,000. In Greater London 1,682 deaths were registered. In the "outer ring" the deaths included 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended August 15, 1903, in the 21 principal town districts of Ireland was 16.6 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Clonmel

and Sligo, viz, 0.0, and the highest in Galway, viz, 35.0 per 1,000. In Dublin and suburbs 136 deaths were registered, including enteric fever 2, diphtheria 1, measles 1, whooping cough 1, and 30 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended August 15, 1903, correspond to an annual rate of 15.4 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Edinburgh, viz, 12.2, and the highest in Greenock, viz, 18.8 per 1,000. The aggregate number of deaths registered from all causes was 505, including diphtheria 1, measles 5, scarlet fever 3, and 12 from whooping cough.

JAMAICA—*Kingston.*—Month of July, 1903. Estimated population, 46,542. Total number of deaths, 122, including whooping cough 1, and 16 from phthisis pulmonalis.

JAPAN—*Nagasaki.*—Ten days ended July 31, 1903. Estimated population, 148,883. Total number of deaths not reported. No deaths from contagious diseases reported.

JAVA—*Batavia.*—Two weeks ended July 4 and July 18, 1903. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

MEXICO—*Monterey.*—Period from April 1 to August 12, 1903. Estimated population, 25,000. Total number of deaths, 1,322, including enteric fever 14, measles 45, whooping cough 23, and 110 from tuberculosis.

PHILIPPINE ISLANDS—*Manila.*—Month of April, 1903. Estimated population, 302,154. Total number of deaths, 549, including enteric fever 9, whooping cough 1, smallpox 1, cholera 27, plague 47, and 84 from tuberculosis.

ST. HELENA.—Six weeks ended July 31, 1903. Estimated population 4,000, including soldiers and sailors. Total number of deaths 10, including 1 from tuberculosis.

SWITZERLAND.—Reports for the two weeks ended August 8, 1903, from 18 cities and towns having an aggregate population of 790,000, show a total of 406 deaths, including 1 from measles, 2 from scarlet fever, 1 from diphtheria, 2 from whooping cough, 1 from enteric fever, and 63 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, June 27, 1903, to September 11, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see PUBLIC HEALTH REPORTS for June 26, 1903.]
